OFFICIAL PAPER OF LEWIS AND CLARKE COUNTY.

The INDEPENDENT has a larger daily circulation than any newspaper between St. Paul and Portland and a larger circulation than any other two daily papers published in Montana.

It has no press room secrets; its subscription books are open to inspection, and it is always ready to prove that its circulation is as represented.

Entered at the Postoffice at Helena as second-class matter.

A NATIONAL WORK.

The subject of reclamation of the arid lands of the west is beginning to attract the attention in that section that it merits. The Chicago Inter Ocean, for instance, devoted nearly a column of its editorial page, on Monday, to a resume of the article in the April number of the Forum, by Senator Stewart, of Nevada, and which was reprinted in the columns of the INDEPENDENT of April 7. While the writer in the Inter Ocean seemed not to be aware of the fact a person so well qualified to discuss the question as Senator Stewart had prepared the Forum article, he showed a just appreciation of the importance of the subject, and the article will help to educate the people of the east to a realization of the fact that there may be the greatest economy, instead of rank extravagance, in a proposition that involves the expenditure of a million or of several millions of dollars in the creation of a national system of irrigation, with the accompanying storage reservoirs and ditches, and probably artesian wells.

Few have not seen what is being accomplished in other sections by means of irrigation can realize the possibilities that are embraced in such enterprises. The fertility of so-called arid lands has been demonstrated a thousand times over, in California, Nevada, Utah, Washington, Arizona, Wyoming and Montana. The utility of artesian wells is strikingly seen in the San Joaquin valley, which but a few years ago was regarded as practically an arid belt, but which now produces bountiful crops of grain and fruits. In this territory, where irrigation has been introduced, the results have been most satisfactory, both in agriculture and grazing, and an ample return for the original investment has been realized. But there can be more done by the general government than private enterprise can ever hope to accomplish, and it is clearly within the province of the government to establish such a system as has been suggested in the article by Senator Stewart.

A correspondent writing from New Mexico calls attention to what has been done by means of irrigation in that country. "Hundreds of my readers," he says, "have traveled over the Santa Fe railroad, and seen through the Rio Grande valley and from their standpoint of grassy, pleasant-looking country in the east, have wondered what use this cheerless area of sand and sage brush could ever be put to; yet in this valley is a farm of twenty-two acres for which \$60,000 has been flatly refused, not one cent of its value being in its proximity to some other place, as the valuable little farms around our great eastern cities, but purely on what it can produce." It is not to be supposed that equal success will attend all irrigation schemes, but enough has been done in that direction to prove what was stated at the outset in this article, that the term "arid lands," so far as it applies to the majority of the lands in the west now monopolized by the cactus and the sage brush, is a misnomer. All those lands require to be made fertile is the bringing of water upon them, and this, in view of the rapidly diminishing area of public land in the United States, should receive the intelligent attention of congress.

WHEN it comes to telling a falsehood for the sake of the party, and telling it without blushing, the St. Louis Globe-Democrat, a republican paper, may be said to "get there" with great unanimity. It is a recent issue of the paper named it was stated that under Gen. Black's administration of the pension office it required fourteen clerks to prepare the list of pensions granted, for daily publication, but that since Commissioner Tanner has taken charge of the office it has been found that one clerk can do the work. The truth is that the publication of such lists was discontinued by Gen. Black because of the expense it entailed upon the government, and that Mr. Tanner was so well satisfied of the correctness of Gen. Black's position that the lists are not now being prepared in the pension office for publication.

TALK of an extra session of congress is being revived. Gen. N. P. Banks, who is one of the survivors of the congress that first elected a republican speaker of the house of representatives, is quoted as saying that the proposed reunion of members of that historical congress should be held in October, as it is probable that the house and senate will be in extra session at that time, which will make it more convenient for gentlemen to attend the reunion. Just what occasion there is or is expected to be for an extra session at that time does not appear. Up to the present time no intimation has been given by the president that he intends summoning congress in extra session.

THERE is a bitter contest over the appointment for the office of United States district attorney for the western district of Missouri. A majority of the republicans of the district are said to favor Mr. Kimball, whose suit is being urged by Congressman Wade, but Mr. Neal, who went to the Chicago convention as a Graham delegate but was one of the first recruits for Harrison, is likely to

get the plum. The Globe-Democrat, speaking of the matter, says: "Of course a president should take care of his personal friends, but he should not do it in such a way as to disappoint everybody else who voted for him in a given state."

THE Helena board of trade might advantageously take the initiative in preparing for a suitable observance of the fourth of July, in connection with the meeting of the constitutional convention which is to assemble in this city on the day indicated. The occasion is an auspicious one, and a celebration such as the citizens of Helena know how to carry out will do a great deal towards showing the people from other parts of Montana, as well as those outside the territory, what the attractions of the Queen City of the Rockies are.

A MUCH-COVERTED one will be given out within six weeks. Adjutant-Gen. R. C. Drum will retire, under the age limit, on May 25, and thereupon it will be the president's duty to name his successor from among the officers of the army of suitable rank. The principal aspirants for the place are Col. W. D. Whipple, Kelton and McKee. Strong influences are being brought to bear upon the president, both politically and socially, in behalf of the several candidates.

THE parliamentary mantle of John Bright has fallen upon his son, John Albert Bright, at least in so far as it has given him the seat in the British house of commons that the elder Bright occupied with so much distinction for about twenty-eight years, representing the constituency of Birmingham. But it is not at all likely that for many years to come the younger man will be able to fill the place in the estimation of the people that his father held.

THE Salt Lake Tribune is authority for the statement that polygamy is still practiced in Utah with little attempt at concealment, and that "the population is increasing all the same." The instance is cited of a Mormon elder who has been living with two wives, one of whom—No. 2—has just given birth to a child.

Persons who send anonymous communications to the newspapers do not reflect that they are guilty of a species of moral cowardice that deprives them of any right to be considered. Volunteer and unknown critics are not the kind whose opinions will carry any weight.

The selection of Fort Kough as the place for the department ride contests will prove highly advantageous to the service. There is no probability in this locality that bad weather will interfere with the shooting.

PERSONS AND THINGS.

Senator Colquhoun, of Georgia, is stamping Massachusetts in behalf of the prohibition amendment. He is 88 years old.

China has never had a female politician. What a splendid opportunity for Dr. Mary Walker and Col. Elliott F. Shepard. The New York and Boston papers have been publishing lists of their citizens who bear renowned names. New York claims to have "Calverton, Knapp and Spaulding" named borne by any living man, Mr. Westminster Abbey.

The United States supreme court is to adjourn May 11, and Justice Gray's marriage to Miss Matthews is expected to take place the following Wednesday, after which the Matthews family will separate for the summer. Owing to the death of Mr. Matthews the wedding will be very quiet.

The king of Nam's name is perhaps the longest of any monarch in the world. It contains fifty-seven letters, and he is called Chulalongkorn for short. He has two different names in addition to this, and the full names of the royal family would fill a column of the newspaper.

According to the Montreal Witness the French language is at present, as was obvious from the last census, rapidly gaining on the English, not only in the Province of Quebec but in the other provinces, notably New Brunswick and eastern Ontario. A similar movement is going on in the New England states. The census of 1880 will startle people in this respect.

A Detroit paper publishes twelve verses of a poem written by ex-Senator Jones of Florida, whose infatuation for a young lady of that city brought him into undesired prominence and marked the decline of his public career. He rhymes about his romance, about the alleged intrigue in the senate, about the "hellish work" of scandal-mongers, and patriotically closes with the confession that insanity and want end the record.

Eugene Schuyler will publish in the May Scribner's some very interesting reminiscences of "Count Leo Tolstoy Twenty Years Ago," when he was one of a remarkable group of Russian writers. Mr. Schuyler was a visitor at Tolstoy's home, and had many long and intimate conversations with him, which are now for the first time published. The recollections will be concluded in the June number.

Edwin Booth has entirely recovered his health and will resume his tour with Lawrence Barrett, May 6, Messrs. Booth and Barrett begin an engagement of three nights in Salt Lake City, jumping from there to San Francisco, where they dedicate the new California theatre, May 15. They play in that city four weeks, reaching Los Angeles June 10, and Portland, June 24. Manager Maguire some time ago stated that he had secured this combination for Helena.

A Noble Diplomat. Washington special. Albert Hawkins, the white horse coachman, is a broad-minded philosopher. As the Harrison coach was standing in front of the portico yesterday morning, a gentleman came up, looked at the horses with a critical eye, and remarked: "That is not as good a team as Cleveland's seal browns, is it?" Albert's face was covered with an expression of unutterable disgust as he said: "Now, boss, you ought to know more than to be saying such things to me. You want to get me in trouble. Look here, boss, the other day I was standing out here and some ladies came along, and one of them says: 'Albert, I am glad that President Harrison kept you in your old place.' 'Thank you, mum,' says I, 'for your kindness.' Then she says: 'I am not as young as lady as Mrs. Cleveland, is she?' 'There were lots of people standing around here listening to what she was saying to me and what I was saying to her, and I thought I would fall off the box, but I just drew myself up and said: 'Madam, I am not a judge of women.'"

Dr. Ho-nan-ko. In his new discovery for consumption, succeeded in producing a medicine which is acknowledged by all to be simply marvelous. It is exceedingly pleasant to the taste, perfectly harmless, and does not sicken. In all cases of consumption, coughs, colds, whooping cough, croup, bronchitis and pains in the chest, has given universal satisfaction. Dr. Ho-nan-ko's Cough and Lung Syrup is sold at 50 cents by H. S. Hale & Co.

CHANGE OF TIME.

Through Chair Cars to Kansas City. The Minneapolis & St. Louis railway, "Albert Lea Route," ever ready to meet the demands of the traveling public, upon March 17th, 1889, inaugurated a through chair car service between St. Paul, Minneapolis and Kansas City, leaving St. Paul daily, except Sunday, at 9:10 a. m., Minneapolis at 9:50 a. m.

These cars are models of perfection and in many respects are superior to those run by any road. The interior is finished in selected and exquisitely polished woods of mahogany, cherry and oak. The curtains, carpets, etc., in harmony of design and color form an ensemble pleasing to the eye and gratifying to a cultivated taste. No pains or expense have been spared to make them the most comfortable and luxurious vehicles of their class in America. For maps, rates, time cards, etc., address nearest R. R. agent or write to: S. F. Boyd, G. T. & P. A., Minneapolis. C. L. Canfield, Gen. Agt., Helena.

WINTER EXCURSIONS TO CALIFORNIA.

On the 15th day of every month the Northern Pacific Railroad company will sell excursion tickets to San Francisco and return at \$75; to Los Angeles and return, \$94. These tickets have an extreme limit of six months from date of issuance, and can be used going any time within sixty (60) days from date of sale. Stop-overs at all points en route are permitted, and returning within limit of ticket. Excursionists have choice of two routes from Portland—by steamer or by rail, via the famous Mount Shasta route. Bear in mind that the Northern Pacific is the only line running through sleeping and dining cars to the Pacific coast. A. D. Edgar, General Agent.
